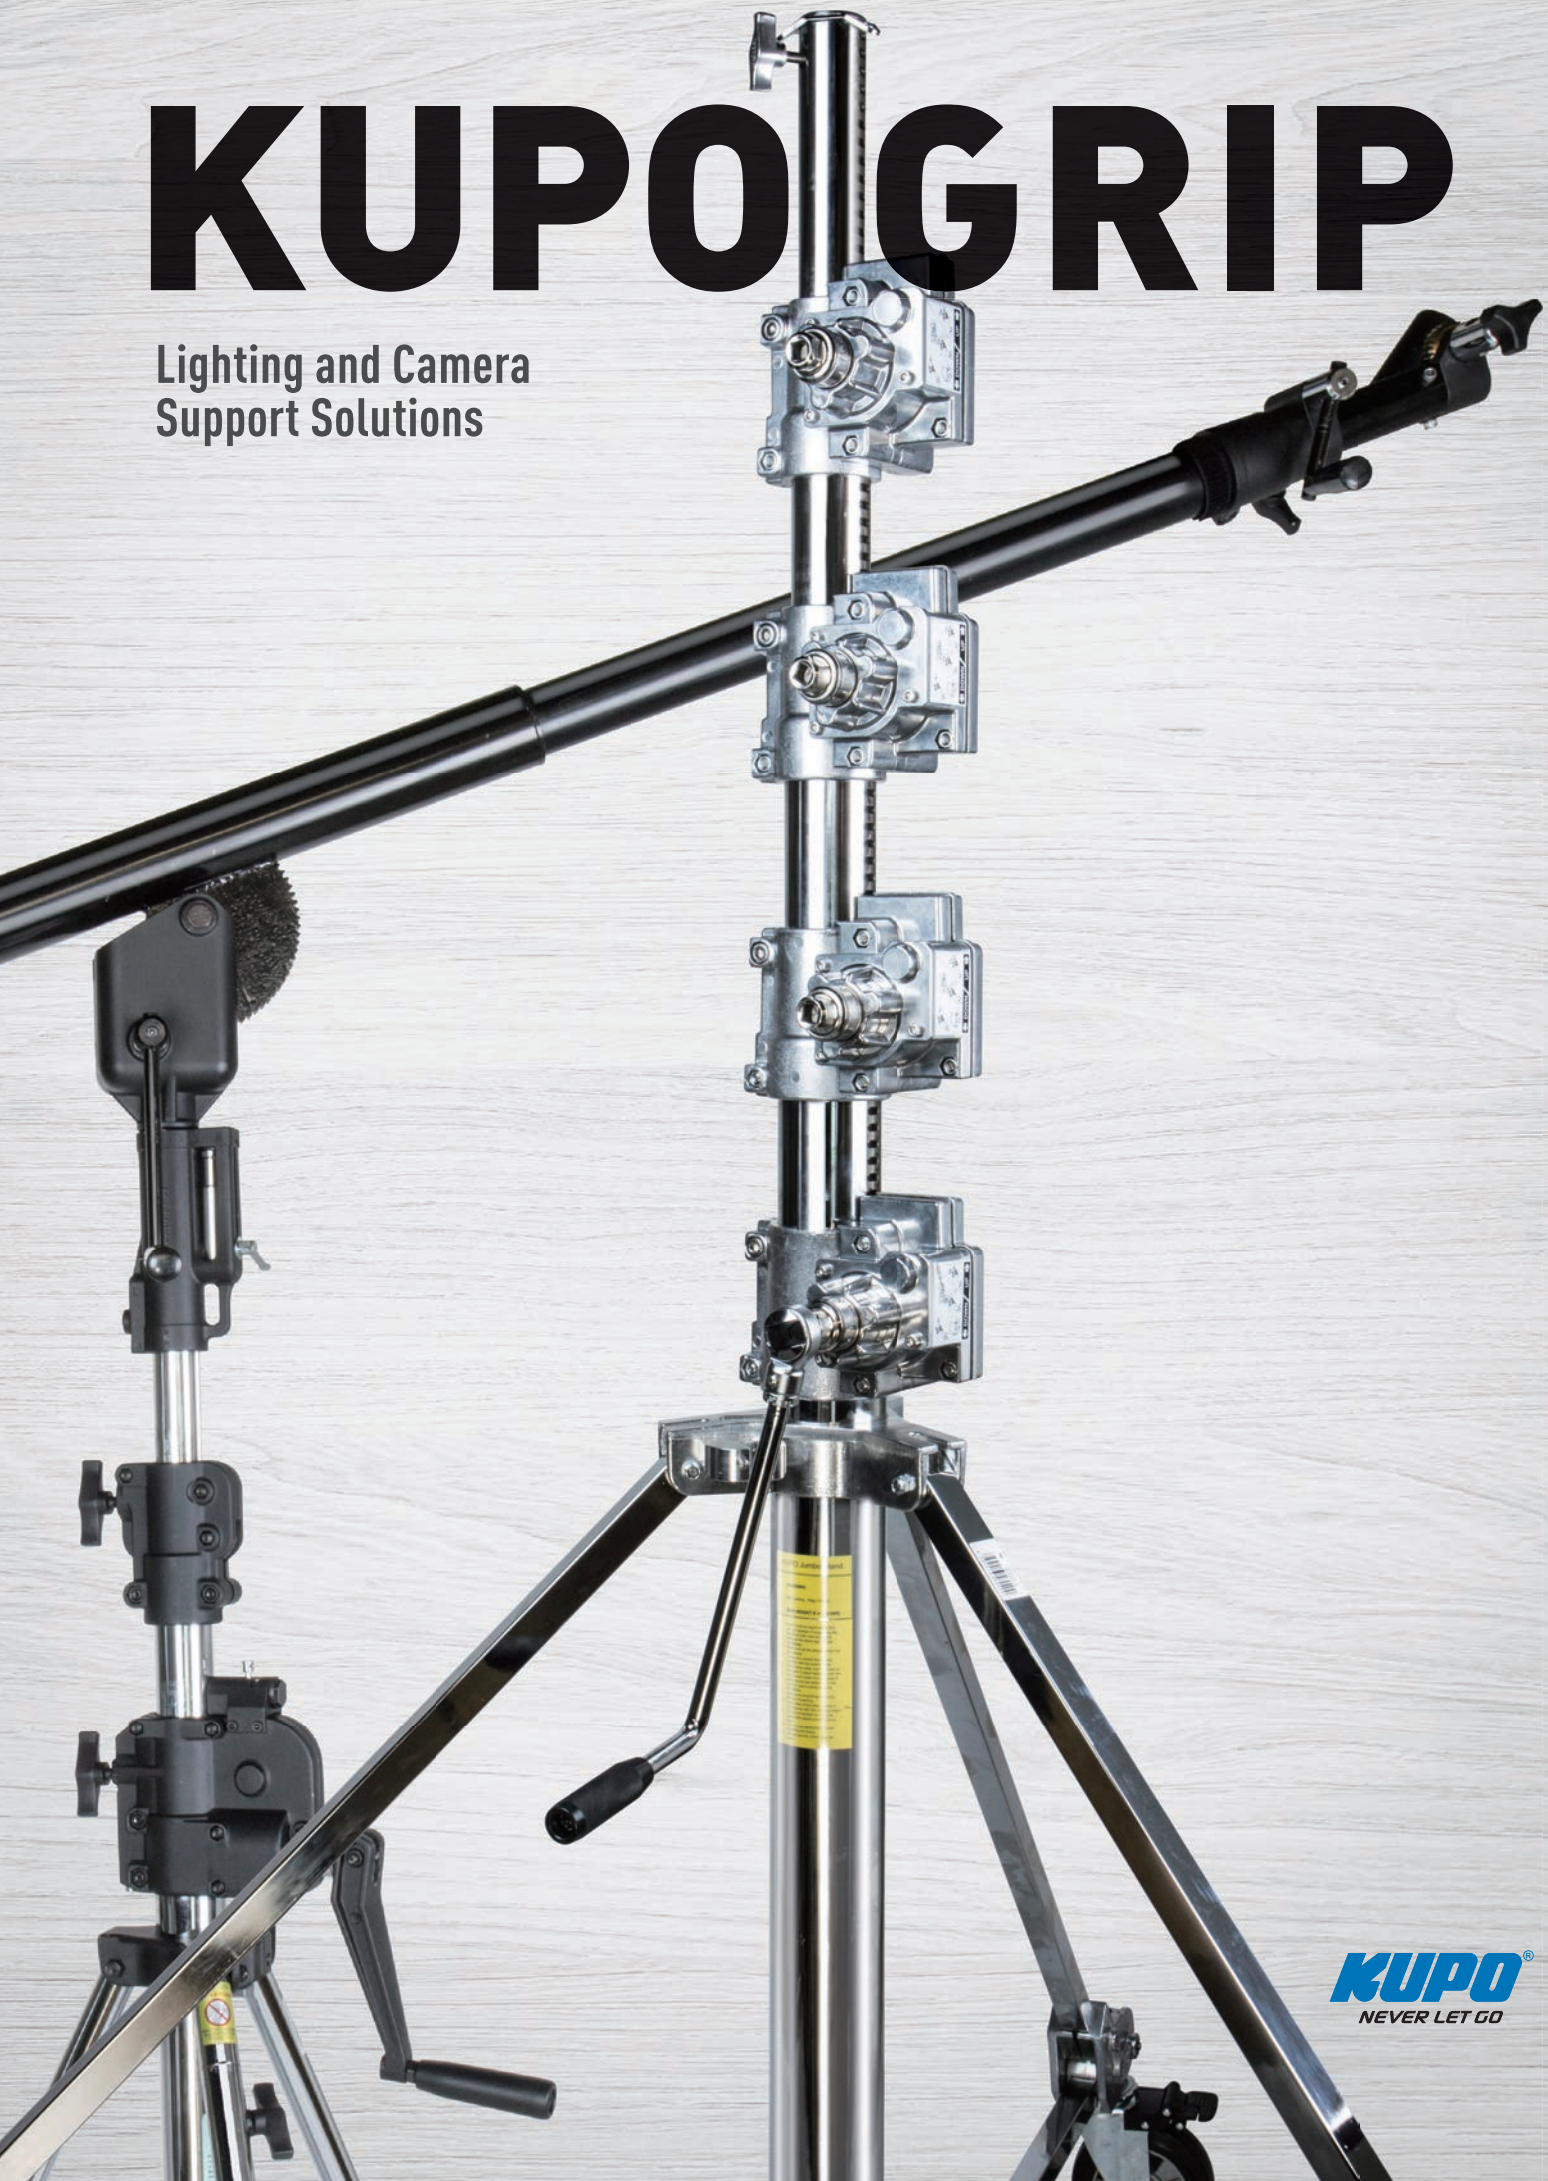
KUPO GRIP

Lighting and Camera Support Solutions



KUPO®
NEVER LET GO

Professional Lighting Stands and Grip Accessories

Kupo Grip was established in 2000 at the dawn of the new millennium. We are now celebrating our 22nd year as a leader in professional lighting and grip equipment for the photo, video and cine market. The success of Kupo Grip is a result of the commitment to those who work behind the scenes in motion pictures, television and photography. We consider you, the image-maker, a partner, integral to our innovative process. We greatly value your experience and listen carefully to both your needs and desires, which inspire us to create better tools to help you do your job with greater ease and efficiency. Kupo has forged its own path in the world of grip by crafting innovative tools with unparalleled quality, sought after and shaped by industry professionals worldwide. To meet these same professionals' needs, we offer numerous patented products including: Quick Release and locking C-Stands, Multi-Direction easy storage Click Stands, Auto Self-Locking Wind-Up Stands, Lever Lock and Release Devices, Anti-Slip Rosettes Friction Discs, for Max Arms, and Quick-Action Telescopic Hangers. All Kupo products have been painstakingly manufactured so you know you can count on their incredible strength and durability in the harshest of environments. They are so durable, in fact, that they create a history of their own through their many years of service. Moreover, the products reliability is accredited with certificates such as TUV-GS, CE, UL and CUL for several electrical products and the popular Wind-up stand, Clamps, Couplers and safety wire.

When it comes to your vision and your grip equipment, we like to say at **Kupo Grip:** **Never Let Go!**

Stand Top
All Kupo lighting stands are available with industry standard top fixings of mounting lighthead and lighting accessories.

T

Compact lightweight aluminum stands with 5/8"(16mm) fixing top and 3/8"-16 screw thread.

G

4-1/2" grip head with additional offset 1-1/8" junior receiver (29mm).

A

5/8"(16mm) fixing baby stud.

U

1-1/8" junior receiver (29mm) fixing on stand top.

S

5/8" baby receiver (17.2mm) with detachable 5/8" baby stud (16mm)

US

1-1/8" junior receiver (29mm) with adapter for 5/8"(16.2mm) baby receiver.

S2

Dual 5/8" baby receiver (17.2mm) with detachable 5/8" baby stud (16mm)

UE

1-1/8" junior receiver (29mm) with ear ring.

J

Japanese type stand comes with I.D. 17.5mm female receiver top attachment.

UW

1-1/8" junior receiver (29mm) with wind bracing bracket.

V

Triple function universal top head with both 1-1/8" junior receiver (29mm) and 5/8" baby receiver (16.2mm). Extra multi direction 5/8" baby stud (16mm).

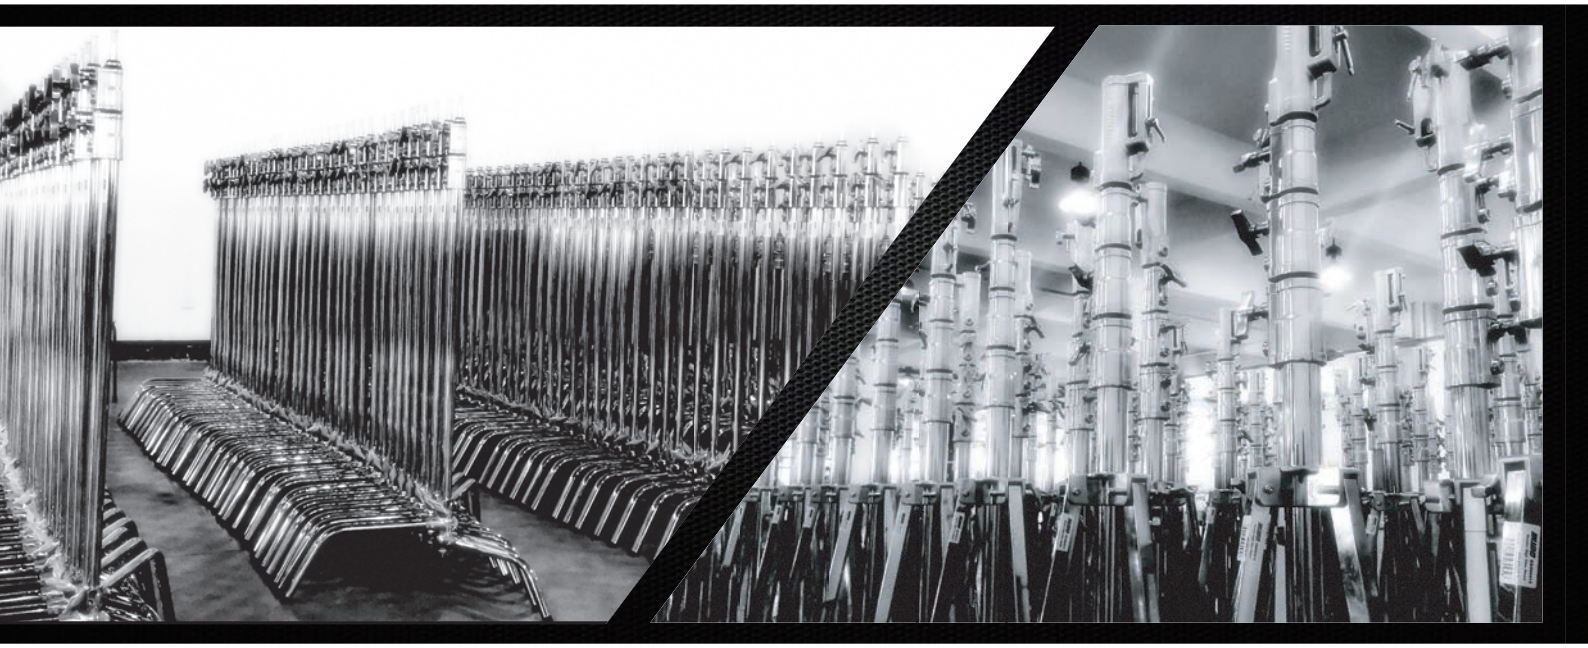
SW

5/8" baby receiver (17.2mm) with wind bracing bracket and camera bracket.

A FULL RANGE OF LOCKING MECHANISMS

Our stand riser column collars consist of pressure die-cast aluminum for strength and durability, that incorporates ergonomic locking knobs to hold and position the light exactly where it needs to be.

SPECIAL FEATURES



Unique bottom spider casting design means the folded stand can be free-standing.

Selected lightweight aluminum stand with aluminum clamping riser provides good elasticity.

Bottom spider casting with spring cushion to prevent jarring of the lamp filament. For those steel stands labeled with "spring cushion".

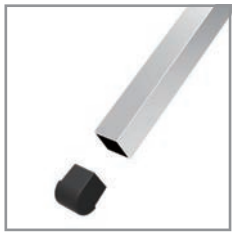
The all-aluminum casting knob comes with a stainless steel bolt for lightweight & long-lasting clamping operation.

Assembled for easy user maintenance where tightness can be adjusted, instead of fixed rivets.

Steel baby pin stand is welded directly to the top section instead of being pinned.

Double leg struts for extra strength and stability.

Selected stands come with velcro supplied to fasten the legs for better storage and cable management.



Stand leg is equipped with PA66 foot pad to protect both leg and ground.

Innovative compact top head with a multi-directional 16mm (5/8") light stud.

Leveling leg allows stand to remain vertical in certain circumstances.

Ear ring device for wind-bracing kit.

Upper spider casting with hanger pin for storage on the rack.

Stainless steel heli-coil insert is equipped inside the aluminum die-cast riser which provides a durable threaded hole.

Embossed end of stud in the aluminum tube with solid pin for a better stand stud mount.

A sizable brake shoe to ensure a much better lock off.

51.5cm 20.27"	184.5cm 72.63"	0.4kg 0.88lbs	Single Pole (without the stand base)

This lightweight four-section stand rises to a height of 6.6', handles gear up to 5.5lbs (2.5kg), and due to its reverse-folding leg design, folds down to just 20.4" for easy packing and transportation. This stand also has an additional unique feature—the center pole (with 5/8" stud) can be easily detached from the base and used as a 72" boompole. The Two-in-One Multi-Stand features an innovative locking design equipped in the side of the pole and base which allows insertion of the pole into the base and twists to securely lock. The pole is locked firmly until the spring release button on the side of the pole is pressed.

Central column can be detached from the base.

Kupo Single Handed Stand features automatically collapsing legs which offer quick setups and easy repositioning. The ability to quickly pick up and put down a light stand without having to open and close the stand legs makes it easy and safe for moving around in crowded locations. It also reduces the chance of accidentally bumping into things or people around you. This rugged aluminum light stand has a maximum height of 247cm (97") and a compact closed length of 73.6cm (29") making it ideal for storage and transportation. Another locking knob is built on the central column for keeping the legs in position when extreme quiet is demanded.

Pick it up, the legs drop straight down.

Folded length
73.6cm (29")

1. Locking knob.
2. Legs are locked while the knob is tightened.

PATENTED A clever four-way interlocking mechanism offers the ideal solution for storage and transportation.

The interlocking mechanism allows the user to fold the stand flat and click it to another.

The unique four-way interlocking design provides no limits to stacking stands.

Bi-color injection knob offers a positive locking and ergonomic grip.

Interlocking mechanism makes it quick and easy to click to another stand.

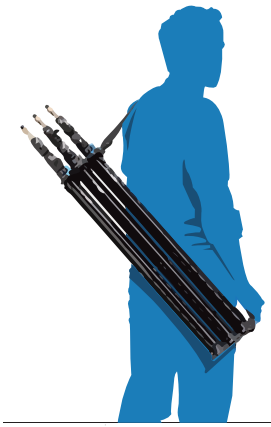
KUPO CLICK STANDS

May stand alone when folded.



Optional strap with two clasps can be attached on the plastic locking loops, allowing hands-free carrying over the shoulder.

CXST01 | Optional shoulder strap.

US-KG080812

Double leg struts for extra stability and strength.

Quick-release clamp design for quick setup and easy for locking tension adjustment with the stainless steel phillips screw.

Features a clever interlocking mechanism that allows the user to fold the stand flat and click it to another in just a snap. The unique four-way interlocking design provides no limits to having stands together and keeping your kits well organized for storage and transport. Kupo Click Stands are constructed of a lightweight aluminum alloy which makes them ideal for location shoots or in the studio. Air-cushioning prevents lighting fixtures from accidentally slamming down if the locking knob is not tightened properly. The optional CXST01 strap can be attached on the locking loops to easily carry over the shoulder.

More features:

1. Bi-color injection knob offers a positive locking and ergonomic grip. Quick release clamp design on the central column for easy and quick setup.
2. Equipped with a 5/8" top stud with a 3/8" thread, plus a removable 1/4"-20 threaded top.
3. Double leg struts for extra stability and strength.
4. May stand alone when folded.

In addition to the clever interlocking mechanism that allows the stands to be linked to another in just a snap, Click Stands also feature a detachable central pole which can be easily removed from base and used as a boom stick. Ideal for mobile lighting on location so that you can go anywhere and position the light in any way you need. The innovative central pole spring locking design is equipped in the side of the pole which allows an effortless twist-to-lock the pole inside the base. The central pole will be locked firmly until the spring release button is pressed.

More features:

1. Aluminum die-casting riser and stainless heli-coil insert provides a durable thread hole.
2. Aluminum die-casting knob with stainless steel bolt for a long-lasting clamping operation.
3. A sizable brake shoe to ensure positive lock off.
4. Assembled by nuts & bolts instead of fixed rivets for easier maintenance and tightness.

Application:

Made of sturdy 1,000 D Cordura Nylon with a moderately padded interior, Kupo light stand bags are made to store or carry your light stands on location with ease. The adjustable wide shoulder strap allows comfortable hands-free carrying over the shoulder. The additional handles make it easy to carry the bag horizontally when you have a backpack full of gear. The sturdy dual zipper can be placed in either the open or closed position. The wrap-around zipper provides a large opening making it easy to get stands in and out of the bag. A great bag to handle all of your light stand needs.

KUPO RUNWAY BASE STAND (350)

US-KS301012

350 Runway Base Stand

The chrome plated steel Runway Base Stand is a low rolling stand base designed to work with large lighting fixtures. Adding an extension column to the junior 1-1/8"(28mm) receiver can easily create a mobile rolling stand. The leg design allows the Runway Base to be folded parallel to one another for easy storage and transportation.

H max	W	Feet	max	T

The Kupo 340 Roller Base Stand with wheels is specifically designed for lighting fixtures that need to be placed in low positions. Features a quick-release locking system equipped on each leg for folding and unfolding the stand within seconds. It also comes with a universal stand top that allows it to fit into any fixture. Comes with a junior pin or baby receiver. Meanwhile, your own rolling stand is available by simply adding a century stand column into the junior receiver (28mm socket). One leg is supplied with a leveling device for adjusting the stand on uneven ground. One extendable leg (additional 12cm / 4.7") is designed for allowing an increase to the loading capability while connecting a boom arm.

The Kupo 546M is a Junior Boom Stand that can support up to 66lbs (30kg). In addition to being a standard light stand for general use, it can easily be converted into a junior boom arm by pulling the central tube out from the stand. Constructed with chrome plated steel, square-end legs and a strong pivoting collar, the Kupo Junior Boom Stand offers stable support for a medium sized light fixture with a softbox or umbrella. One leveling leg is also equipped to stabilize the load on uneven terrain. The optional casters, KC-100S can be added for easy rolling of the stand.

Pivoting collar with adjustable lever handle allows the K-Stand to be easily used either as a standard light stand or boom.

Kupo wind-up stands are constructed with chrome plated steel and a geared column that enables a single operator to raise and lower heavy loads safely with just the turn of a handle. Both risers extend simultaneously at one elevation of 4.4cm per handle turn. The unique automatic self-locking mechanism is equipped to prevent the light stand from dropping unexpectedly making the operation safer. All metal parts are made of stainless steel making our wind-up stands more robust, sturdy, and with excellent resistance to corrosion.

PATENTED **The safety pin will automatically insert into the hole in the tube when the wind-up is used.**

FEATURES OF WIND-UP STAND:

LOCK POSTION
The safety pin will insert automatically into the hole in the tube when the wind-up engages.

The stand top is mounted by a steel bolt through the top tube that insures sturdy and solid assembly.

UNLOCK POSITION
The inside spring will bring the safety pin back.

The crank handle folds back for travel. It also can be placed in between tripod legs to prevent the risers from falling accidentally if the lock is unexpectedly disengaged.

The tension of the brake shoe can be adjusted with an Allen wrench.

Velcro is supplied for better cable management.

Top section tube can be adjusted by stepping on the foot step.

By using the leveling leg the stand can be quickly leveled on uneven terrain.

Bright color warning sticker for safety operation.

Casters are optional for easily moving the stand. The stand foot is rugged zinc-casting. Dia.: 100mm with brake and M10 attachment. There are three in a set. (**KC-100**)

483-BP Base Plate
Optional accessory to be used when the stand has to be secured to the floor for safety reasons.
Compatible with stand models: 481, 482T, 483T and 470. (Set of 3)

The Kupo Jumbo Stand, made from chrome plated steel, is specifically designed to satisfy the industry's requirement for extra heavy loads with the ultimate of safety in mind. The Kupo Jumbo Stand can support a load capacity up to 70kg (154lbs) and delivers a maximum working height of 6.1m (20') when fully extended. Features Kupo's direct drive gear mechanism and auto-locking instead of pulleys and cables.

Features:

1. Large size T-handle on each riser is ergonomically design for maximum torque.
2. 28mm (1-1/8") junior receiver with 3 eyelets for wind bracing kit.
3. Dual handle equipped on bottom spider casting for easily folding the base.
4. Leg brace is made of rectangular steel tubing for maximum stability and safety.
5. Auto self-locking device prevents unintentional and uncontrolled lowering of the load.
6. Industry 6" (152mm) braked caster included makes stand moveable in the studio or on location.
7. Assembled by nuts and bolts for easier maintenance and adjustable tightness instead of fixed rivets.

28mm (1-1/8") junior receiver with 3 side hole for wind bracing kit.

Large size T-handle on each riser is ergonomically design for maximum torque.

Extension limit marking on each section

Dia.6mm x 10M nylon rope with stainless spring hook are included for attaching to the eyelets of stand to tether the top of stand to the ground (set of 3).

Auto self-locking device prevents unintentional and uncontrolled lowering of the load.

The detachable ratcheted crank handle prevents damage and reduces protrusions during transportation or storage.

US-KG096611

RS-RR3807 | Rope Ratchet Tie Down

The polyester braided rope is 3/8" (9.5mm) in diameter and 23' (7M) in length.

For attaching to the eyelets of stand to tether the top of stand to ground with the ropes. (Optional)

Leg brace is made of rectangular steel tubing (30x30mm) for maximum stability and safety.

Dual handle equipped on bottom spider casting for easily folding the base.

Industry 6" (152mm) braked caster included makes stand moveable in the studio or on location.

The unique gear machinery design keeps the caster steady that allows moving the stand easily with base closed.

The Kupo Slider Stand combines perfect build quality, weight and solid footing to give perfect support for heavier cameras and heavy-duty sliders. The working height from 58cm (22.83") to 115cm (45.27") also gives a perfect height range for dolly work. It comes with two legs for easy leveling on uneven terrain, such as hills, mountainsides, rocky environments, and stairs. The 28mm(1-1/8") junior receiver is welded directly to the top section making the stand top sturdy. Even though it's designed as a slider stand, the 161MB is versatile and can be used as a low mighty stand for a lighting fixture. And anything in a low configuration can mount virtually with adapters. And the junior(28mm) to baby (16mm) stud (KS-200) is recommended to mount any equipment that comes with a baby (16mm) receiver on the Kupo slider stand.

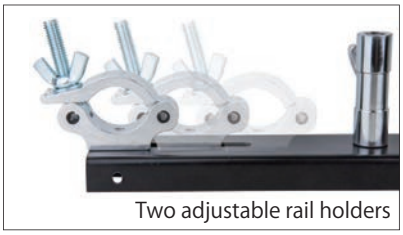
Stand Bag for 161MB

The bag is made to store or carry one slider stand on location with ease (Optional).

Application

Two leveling legs for uneven terrain.

The Universal Track End is especially designed for Sliders and Dollies. It features a 2"(48-50mm) diameter rail. The TVMP adapters at the center of the bracket allows mounting to any lighting stands that come with a baby stand or junior receiver. The U-shaped structure also allows the brackets to free-stand on the floor for low-angle shooting. (Set of 2)



Two adjustable rail holders

US-KG029912

KS-161 Universal Track End W 3.3kg 7.26lbs

More features:
1. Two adjustable rail holders offer a useable distance between the rails (center to center) from 19.7cm(7.75") to 40.2cm(15.83").
2. Additional M10 holes are drilled into each end of the bracket for enhanced stability by mounting the couplers on with the pipes.

On the floor

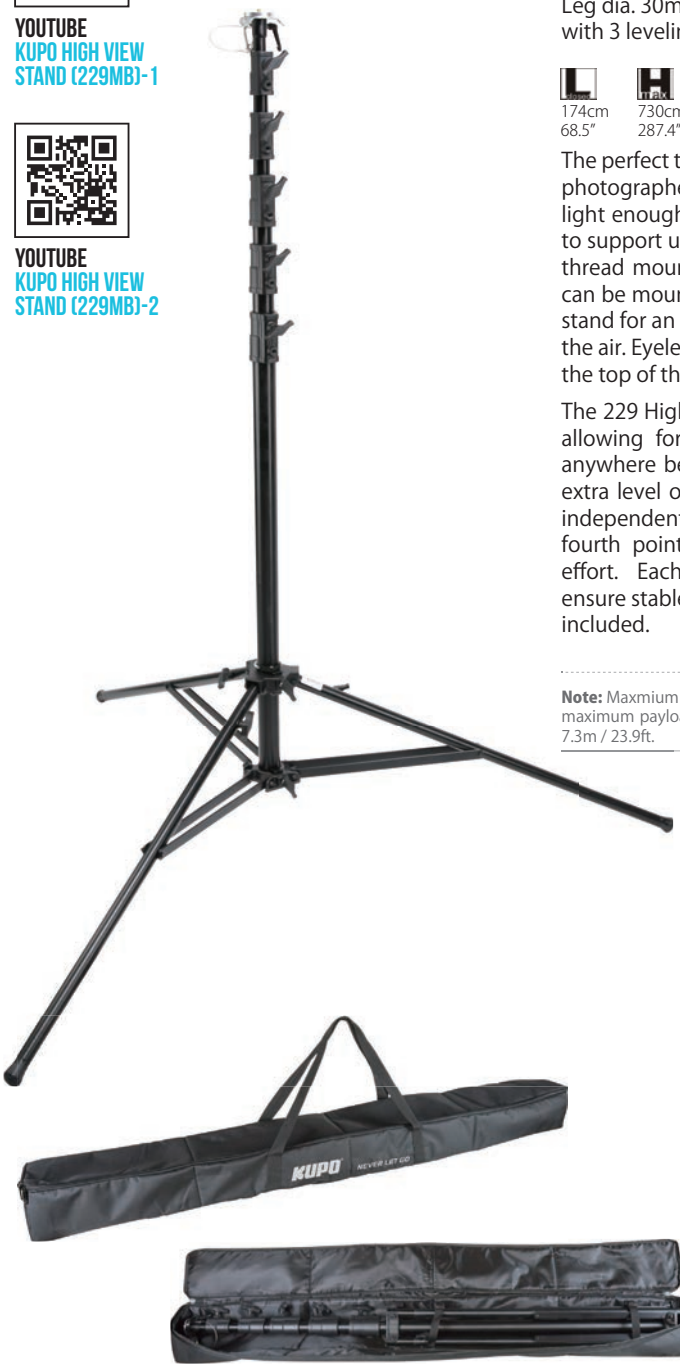
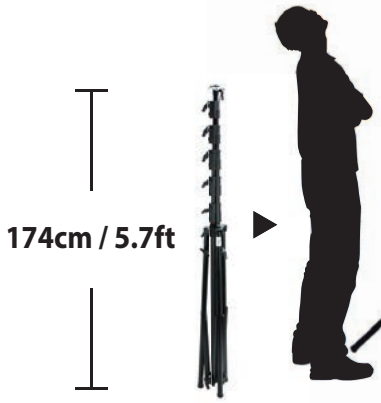
L min	H max	h min	W	FLD	max	T
174cm 68.5"	730cm 287.4"	168cm 66.1"	10.8kg 23.8lbs	177cm 69.7"	10kg 22lbs	SW

The perfect tool for real estate, event, landscape and school photographers. Made from aluminum, the High View is light enough to be carried on location but strong enough to support up to 10kg / 22lbs. It is equipped with a 3/8"-16 thread mounting plate on top, so that a tripod ball head can be mounted to it. A steel tether is also attached to the stand for an extra level of security while a camera is high in the air. Eyelets in the top plate can also be utilized to tether the top of the stand to the ground using guy wires.

The 229 High View features 5 risers and 6 column sections allowing for mounting a camera or lighting accessory, anywhere between 1.9m (6.2ft) and 7.3m (23.9ft). For an extra level of stability, the center column can be lowered independently of the legs and hardware. This allows for a fourth point of contact with the ground with minimal effort. Each leg also has its own adjustment built in to ensure stable set up on uneven ground. The carrying bag is included.

Note: Maxmium loading weight is rated at 10kg / 22lbs, however, 1kg / 2.2lbs maximum payload at 6 degree inclination while the stand is full extended to 7.3m / 23.9ft.





The bag is made to store or carry on location with ease (Included).

Other features:

A steel tether is also attached to the stand for an extra level of security. A 3/8"-16 mounting plate in top, so that you can mount a ball head to it.

Bubble level is attached to the column to assist for easy leveling of the stand.

Three leveling legs for added ease of set-up on uneven surfaces.

Eyelets in the top plate can also be utilized to tether the top of the stand to the ground using guy wires.

Equipped with rubber feet to increase stability on non-slip surfaces.

Dia.6mm x 10M nylon rope with stainless spring hook are included for attaching to the eyelets of stand to tether the top of stand to the ground (set of 3).

C-STANDS

Century stands, or simply known as, C-Stands, have been the most common type of grip equipment used by the filmmaking industry for decades due to their strength and flexibility. Used on its own, or in combination with a grip head and grip arm, the C-Stand is used for mounting lighting equipment and a whole variety of light shaping tools and accessories.

Century Stands, or simply known as "C" Stands, have been one of the most common types of grip equipment used by the filmmaking industry for decades due to their strength and flexibility. Used on its own or in combination with a grip head and grip arm, the C-stand is used for mounting lighting equipment and a whole variety of light shaping tools and accessories. All Century Stands feature a unique base specially designed with three varied leg heights. This enables the user to position, or "nest" the stand bases so that the risers are just inches apart from one another for use in close proximity mounting of lights and other grip equipment or easy storage.

Kupo Master C-Stand with Turtle Base features a unique innovation in the world of C-Stands that enables the still or moving image-maker to open and collapse the legs of the base in under two seconds! The Master C-Stand is outfitted with a patented spring ring locking system that removes all tension from the legs so that gravity does the work for you. The removable base also separates from the main riser section for easy transport. Another advantage of a turtle base is that once you remove the main riser section, you have a junior 1-1/8" (28mm) receiver to accept any junior stud or accessory.

C-Stand Bases

This is a replacement base for the Master C-Stands with Turtle base. It features a zinc alloy base casting that's five times stronger than aluminum to sustain the weight of heavy sandbags and people standing on it. The hollow junior pin receiver allows debris to pass through for easier cleaning and maintenance, and the patented spring ring locking system enables you to open and close the base in under a second. It may be used as a very low stand for backlites or different types of stands with various extension columns.

A junior 1-1/8" (28mm) receiver.

PATENTED Locking system design.

Sliding Leg C-Stand

Features two legs that are spring loaded to open in fixed positions, while the third leg is height adjustable by loosening a locking knob and sliding it up and down the main riser section. This enables the user to raise one leg higher than the others to level out the stand on an incline or uneven terrain. This feature provides optimum support of your light heads, reflectors and gobos.

KUPO 40in Master C-Stand With Sliding Leg & Quick-Release System

Kupo CL master C stand is the latest addition to Kupo C stand series, featuring a patent-pending mechanical design that allows you to enjoy quick–release set up and a sliding leg for an incline or uneven terrain. Just unlock the knob of the longest leg so that all legs can be swung to the correct positions in seconds. While the longest leg is doing a leveling job and the spring-loaded locating pin is engaged, then the middle leg is able to keep in place preventing tip-over from an accident. The Master Sliding Leg C-Stand provides quick, safe, and solid support.

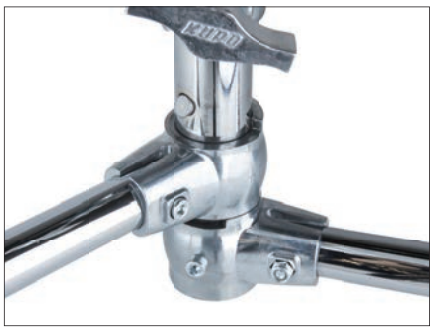
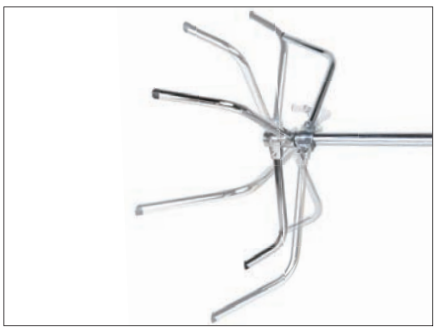
Features:

A sliding leg for an incline or uneven terrain.



Locating pin is designed to be engaged for preventing accidental collapse and tip-over.



Unlock the knob of the longest leg so that all legs can be swung to the correct positions in seconds.

KUPO Grip Head (also gobo head) is specially designed to be mounted on a C-Stand with its 16mm socket. Four different sizes and a rotatable V jaw allows the user to attach scrims, flags, cutters, reflectors and backdrops to meet various requirements of lighting control.

More Features:

1. Aluminum casting body with 16mm mounting hole for a 5/8" (Baby) stud or stand top.
2. Non-slip, non-stick, aluminum braking pad offers secure locking and precise control compared to fiber which would deteriorate.
3. Large size T-handle is ergonomically designed for the biggest torque
4. Four V jaws for different dia. (5/8", 1/2", 3/8", 1/4") pins or tubes.
5. V jaws with special tooth design offer a better grip.
6. Steel material makes the located pin sturdier than an aluminum casting pin.
7. Stainless steel central bolt provides the most durable construction.
8. Dedicated bearing added to reinforce the torque for a stronger grip.

A Grip Arm (or Gobo Arm or Boom Arm) for a C-Stand can be used in conjunction with a 2-1/2" grip head (KCP-200), giving you complete flexibility to position a gobo such as flags, scrims and silks as well as other accessories virtually anywhere. The surface of the tubing is painstakingly machined to create a rough texture to ensure a non-slip surface. The 2-1/2" grip head consists of a pair of rotating aluminum discs attached to a 5/8" (16mm) receiver. The discs have four different sized "V" shaped jaws to accept any accessory with a 5/8", 1/2", 3/8" or 1/4" mounting stud or tubing. Also features an oversized ergonomic "T" handle and dedicated roller bearings designed for maximum torque, and constructed around a solid steel central bolt with a fixed solid pin to secure it to the aluminum casting for increased strength and durability.

Extra reinforced roller pin to secure extension arm.

1/4"-20 female thread on the top.

KCP-246 Super Grip Arm

W 1.45kg 3.2lbs

US-KG203812

Offers an excellent mounting solution for precise placement of lights over obstructions or any awkward position. It is built with a 40" steel extension arm with a baby stud and equipped with a Super Grip Finger, and a 5/8" swiveling pin on a ball joint pivot. All axis lock positively with just one ratcheted handle.

YOUTUBE
KUPO GRIP ARM SUPPORT (KCP-215)

Tiny clamp with double ball.

Length adjustable knob.

Fit for 3 way clamp and Convi clamp.

KCP-215 Grip Arm Support

L 56cm 22" H max 78cm 30.7" W 0.5kg 1.1lbs

US-KG200912

This is especially designed for giving the most support to a grip arm. It is constructed with an extendable aluminum column, and comes with the ball joint pivot clamp in one end, and an angle-adjustable attachment on the other end. The attachments can also be easily fitted into the KCP-930 which is a lightweight aluminum clamp for quickly coupling the stand tube from 35mm to 50mm with its spring locking design. In addition to Kupo 3 way clamp (KCP-930), the grip arm support can be also fitted into the 16mm socket of Super Convi clamp. With this functional support arm, the loading weight of a grip arm could be increased and a sliding problem could be solved.

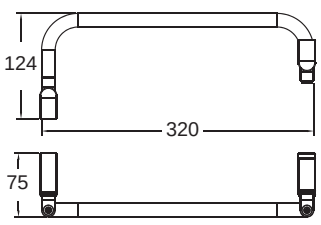
KCP-216 Boom Arm Support

L 56cm 22" H max 78cm 30.7" W 0.5kg 1.1lbs

US-KG201012

Similar to KCP-215P but gives the support for a boom arm instead of a grip arm. This is constructed with a two sectioned extendable aluminum column with angle-adjustable attachments at both ends. Connecting two 3 way clamps KCP-930 (or Super Convi clamp, KCP-700) on the stand tube and boom arm, the loading weight of boom arm is significantly increased.

Super strength magnet equipped for attaching the steel column easily when stored.



KS-320 Microphone Boom Holder

L 32cm 12.6" W 0.37kg 0.82lbs

US-KG011112

Kupo boomgrip is designed for securely and easily mounting a microphone boom on a C-Stand through the grip head. Constructed with chromed plated steel and a rough texture surface treatment to ensure the holder is firmly attached on the grip head. The rubberized coat on both U hooks offers great protection for the boom pole from scratching by metal devices and keeps the boom pole from rotating on the U hooks. The super strength magnets are equipped to offer a great placement solution for easily attaching the holder on the steel column of the stand.

Designed primarily to control natural or artificial light on indoor or outdoor shoots. Flags are square or rectangular steel frames stitched with fabric and come with a 9.5mm diameter mounting pin welded on the steel frame for connecting a grip head (or gobo). Flags are typically used with C-Stands so you can position them into place to create contrast, change lighting ratios, add diffused light, or block light completely in specific areas.

Designed primarily to support overhead frames, also known as “butterfly frames”, this giant is ready to take your support needs skyward. Each riser is spring cushioned as a safety feature to protect lighting fixtures from a sudden drop if the locking collar becomes loose. The solid steel construction has a maximum load capacity of 88.2 lbs (40kg) and is equipped with braked casters to easily reposition heavy loads. Each caster is equipped with a peg that extends past the wheel allowing it to stand upright when collapsed. The High Overhead Stand also features a “true combination” head with a 4 1/2“ grip head, and a junior 1-1/8” (28mm) receiver to accept any kind of mounting challenge.

Casters make your light stands movable while doing work in the studio. Casters protect the floors, keep things quiet on set and of course, make repositioning the lighting fixtures that much easier. All Kupo casters are sold in sets of three and come with equipped brakes that prevent wheels from rolling and keeps your stands securely locked in place.

KUPO BIG BOOM (KCP-636B) & 3 SECTION WIND UP STAND (483T)

KCP-636B Big Boom US-KG603311

Big Boom is the latest addition to the Kupo boom arms series, featuring a four-way geared control design including pan, tilt, rotation and telescopic extension which allows positioning lights with ease and comfort in difficult and demanding situations. The 1-1/8" (28mm) junior receiver and 5/8" (16mm) baby receiver on the top of the aluminum telescopic column are ready for any lighting fixtures to be securely mounted with positive locking knobs. Fully folded length is 2.25M (7.5'). With the telescopic column, the Big Boom can be extended to 3.63M (12') to meet the demands for most jobs. Saddlebag style counterweight bag with holding straps keeps it securely attached to the boom and increases the boom stability. Ideal to mount on castered wind-up stands to secure an exact position for your light with ease and convenience. The unique mechanical design allows the boom to fold down neatly which provides you with an ideal solution for storage and transportation.

2 sections: (dia. 45, 55mm)
Material: Combination of black steel and aluminum tubes.
*6kg / 13.2lbs at maximum extension.

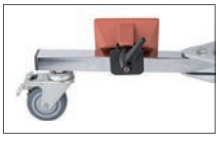
US-KG603511



KCW-04 Counter Weight 4kg (8.8lbs) US-KG093513

Constructed from heavy duty painted iron, the Kupo counter weight is designed to work with a boom to balance heavier lighting rigs. Features a locking clamp which makes it easier to be moved up or down the boom accordingly whereas a bag remains at the end of the boom only. The rubber pad reduces surface damage and enhances gripping actions. Fits with any tube size between 20mm and 35mm in diameter.

Also known as “Menace Arm” it is designed primarily to boom the set in order to hold lighting in the desired position while keeping the stand out of the shot by the safest method. It works with a standard 1-1/2” schedule 40 pipe (48.3mm). The front adapter of the kit comes with 2 baby pins and 1 junior receiver which allows you to mount lighting fixtures or other grip accessories like a flag or frame. The rear adapter is also welded with 2 hooks for hanging over the sandbags to increase stability of the boom and a D-ring which is for a ratchet strap connection to the D-rings of the front adapter and center adapter which are mounted on the grip head. The joint pipe adapter comes with dual knobs for safely mounting while connecting the pipe from two sides. Features the unique captive locking knob which prevents the knob from coming off even if completely unscrewed. The safety wire with Linchipin is attached for an extra level of security.

Pipe Boom Kit Includes:

1. Dual baby pin and single junior receiver front adapter x 1 pc
2. Center adapter with T-slot ear x 1 pc
3. Joint pipe adapter with 4 knobs x 1 pc
4. Rear adapter with dual sandbag hooks x 1 pc

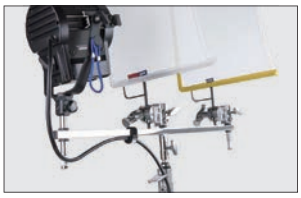
KUPO BABY TRIPLE HEADER (KS-066)

A threaded nub on the side of bar
to hold the knob when using on a junior stand.



KS-066 Baby Triple Header

W 1.5kg 3.30lbs

US-KG009312

The handy adapter allows you to mount multiple light fixtures or accessories onto a single light stand. Features five baby studs with embossed necks welded onto sturdy steel measured 20mm(H) x 20mm(W) x 800mm(L) and offset for mounting five lights. It can be mounted on the stand top of a baby stud (16mm) or fit into a junior receiver (28mm) Additional 5/16"-18 threaded nub on the side of bar to hold the knob when using on a junior stand.

KS-055 Junior Multi-Header

W 4.59kg 10.10lbs

US-KG004111

The Junior Multi-Header is a 40 x 40mm solid steel square tube, 100cm (40") length with anti-reflection black coating. Five junior receivers are welded to the header for a maximum of five lighting fixtures. The header is attached with a junior stud (28mm) for a universal stand top or any mounting accessories that come with a junior socket. Both underside junior receivers are equipped with safety wires to ensure this essential safety aid is always on hand. The Multi Header will support up to 50kg (110lb) of gear equally distributed on both sides of the Header and 15kg (33lb) of gear mounted on one side.

US-KG004211

W 4.65kg 10.23lbs

KS-056 6 x Lantern T-Bar

The 6x Lantern T-Bar is a handy way to mount up to six light fixtures on a heavy-duty light stand at once. The steel bar is measured 25mm(H) x 50mm(W) x 1420mm(L) and has six butterfly nuts to secure lights. It will support up to 12kg (26.4lb) of gear equally distributed on both sides of the Header and 6kg (33lb) of gear mounted on one side. The T-Bar mounts to a Junior stand via its (28mm)1-1/8" spigot.

Constructed with chrome-plated steel, the handy baby stand extension is designed for adding the length from a top of a baby stand, baby plate or any equipment that comes with a baby stud. Features the unique design of 5/8"(16mm) ID and 1-1/8"(28mm) OD in the end of the extension tube that allows a fit for a baby pin and a junior receiver after removing the knob. An extra1/4"-20 female thread on the top provides a great mounting solution to any lighting or video accessory that comes with a 1/4"-20 male thread. The knurled neck design on the baby stud also prevents slippage while the light is mounted.

The bottom of the riser section has a junior 1/8" (28mm) stud that will fit into a Master C Stand Base, Runway Base or any piece of gear with a junior 1/8" (28mm) receiver. It can extend the length from 138cm to 228cm.

027M 17" (45cm) Junior Stand Extension

L 45cm 17.7" | W 1.9kg 4.2lbs | T V | US-KS080312

Made of chromed-plated steel with a die-casting junior receiver, the junior stand extension allows you to extend 17.7" (45cm) on a stand, baby receiver wall plate or junior wall plate, or any equipment that comes with a junior receiver.

---

017 2-Section Extension Pole

L 27cm 10.7" | H max 43cm 17" | W 0.42kg 0.9lbs | US-KG092411

The extension pole includes one riser and two sections and comes with a 3/8"-16 thread male on one end and 3/8''-16 thread female in the other. It allows it to be extended from 27cm (10.7") to 43cm (17") and can be locked with the die-casted aluminum wing locking knob. Aluminum material. 1 riser, 2 sections (Dia. 30mm & 25mm)

Kupo offers various adjustable extension columns including lightweight aluminum and heavy duty steel columns to meet professional lighting control requirements by connecting with couplers, clamps, stands etc.

013-A Pole For Folding Mini Stand

L 48cm 19" | H max 80cm 31.5" | W 0.35kg 0.77lbs | T T | US-KS041411

2-section black aluminum vertical pole for KUPO folding base mini stand which allows extending the maximum height of 2.7' (80cm). Aluminum material. 1 riser, 2 sections (Dia.: 1", 7/8")

---

042 4-Section Baby Stand Extension

L 42cm 16.6" | H max 127cm 50" | W 0.4kg 0.91lbs | T A | US-KS041511

4-section black aluminum pole for extending your stand to the maximum height of 4.2' (127cm). Aluminum material. 3 risers, 4 sections (Dia.: 1", 7/8", 3/4", 5/8")

---

092 3-Section Baby Stand Extension

L 89cm 35" | H max 230cm 92" | W 0.6kg 1.32lbs | T T | US-KG092311

3-section black aluminum pole allows extending from 3' (89cm) to 7.7' (230cm) and can be locked with the die-casting wing locking knob. Also may be used as a hand held light or microphone boom. Features a TVMP adapter at the bottom of the pole which allows a fit for a 16mm (5/8") stud or 28mm (1-1/8') receiver. Aluminum material. 2 risers, 3 section (Dia.: 25mm, 22mm, 19mm)

The super Viser Clamp is built with an aluminum die casting body making it sturdy and lightweight. The moveable jaws are designed for mounting on tubes or planks up to 101mm (228mm is available for longer version KCP-601). With the innovative grooved design on the threaded shaft, both jaws can be kept in the same direction all the way. In addition to the 16mm pin located at the end of the shaft, the unique design of 16mm socket is also built on the clamp that allows all Convi Clamp accessories to fit onto the Super Viser.

Features:

(1) **Anti-Twist**
A clever groove notched into the back of the clamp keeps the jaws aligned with one another as they open and close.

(2) **Rubber Padded Jaws**
Mechanical interlocking design instead of glue between the rubber pad and the aluminum die-casting jaws, makes the rubber pad firmly attached to allow secure mounting vertically or horizontally.

(3) **5/8" (16MM) Baby Pin**
The threaded shaft terminates in a 5/8" pin for mounting lights or grip accessories.

(4) **Hex Receiver**
The hex socket is compatible with Convi or Super Clamps for additional mounting options.

(5) **Ergonomic Handle**
The ergonomically designed handle provides maximum torque and security

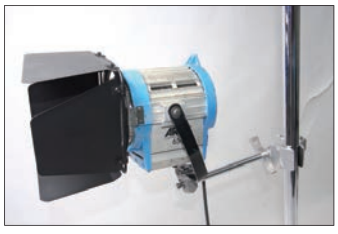
KS-610

Super Viser 10in Extension Adapter 0.4kg 0.88lbs

Constructed from precision machined steel with chrome plated surface treatment, the extension adapter allows the center jaw of the super viser clamp to increase the length for a wider gripping range to 10"(25.4cm).

Application:



1/4"-20 threaded female on the dia. 3/8"(10mm) knurled rod.

3/8" -16 threaded male stud on the bottom of jaw.

Groove design keeps the jaws aligned with one another as they open and close.

KCP-660B Mini Viser Clamp

W 280g 9.9oz

US-KG602811

Mini version of the Super Viser Clamp which features a 1/4"-20 thread female on the dia. 3/8"(10mm) knurled steel road and a 3/8"-16 male stud on the bottom of the jaw for connecting with a variety of lighting and video accessories. Ideal for a small backlight, to help hold a portable greenscreen, shotgun mic and perfect for confined spaces like tabletop photography or car interior photography. Jaws are constructed with alloy die-cast aluminum and mechanically interlocked with the rubber pad which gives superior weather assistance for locking it securely and gives maximum gripping range up to 2"(51mm). The 1/4" male -1/4"male adapter spigot (KS-051) is included.

1/4"-20 threaded female on the dia. 5/8" (16mm) baby stud .

3/8" -16 threaded male stud on the bottom of jaw.

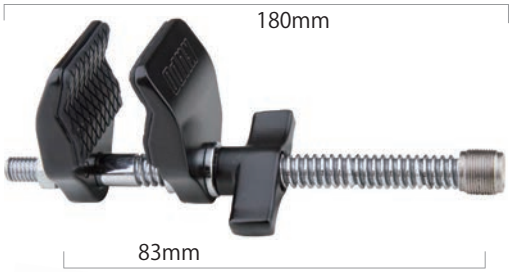
Groove design keeps the jaws aligned with one another as they open and close.

KCP-662B Mini Viser Clamp w/ Baby Stud

W 351g 12.4oz

US-KG603111

Features a 5/8"(16mm) baby stud instead of 3/8"(10mm) shaft for connecting with lightweight lighting fixtures and any accessories with 5/8" (16mm) baby receiver. Meanwhile, a 1/4"-20 threaded female is design for fitting into variety of lighting and video accessories.



5/8"-27 Male Thread for Microphone Mount Holder.

3/8" -16 threaded male stud on the bottom of jaw.

Groove design keeps the jaws aligned with one another as they open and close.

KCP-667B Mini Viser Clamp w/ 5/8"-27 Thread

W 400g 14oz

US-KG603811

Features a 3/8"-16 female to 5/8"-27 male bushing on the 3/8"(10mm) threaded stud for easily mounting microphones on shelves, benches, cross bars, carts or desktop. The removable bushing also allows you to mount any equipment that comes with 3/8"-16 female threaded on the clamp.

US-KG702612

KCP-724 Wall Spreader Set For Lumber 2" x 4"

Designed for a background support, or an overhead beam to hang lighting fixtures by placing cut lumber at each end. Just simply screw the planks into the wall spreader ends and then adjust the bolt to ensure a tight fit to wall. It can be used in both horizontal and vertical positions. The thickness of the square steel plate is 0.25"(0.64cm).

W 3.2kg 7lbs

US-KG701812

KCP-712

Wall Spreader Set For Pipe 1-1/2" Schedule 40

The function is as the same as KCP-724 but rigging of any round pipe comes with 1-1/2" schedule 40 which is OD 1.9"(48.3mm) instead of lumber between two rigid points. The thickness of the square steel plate is 0.25"(0.64cm).

KCP-605 6″ Chain Clamp

1kg 2.2lbs

US-KG600412

KCP-606 10″ Chain Clamp

1.2kg 2.64lbs

US-KG600512

The Kupo Chain Clamp with Duel Baby 5/8″ Studs is a versatile lighting rig that allows you to mount on any size pipe up to 6″(KCP-605) or 10″(KCP-606) in diameter. Due to the flexibility of the chain, it can be wrapped around odd shaped objects such as a tree branch. This clamp features two baby 5/8″(16mm) studs, one mounted on the back of the clamp and another at a right angle at the end of the handle that is used to adjust the tension when locked down. The studs have a knurled texture to prevent fixtures from rotating when locked in place. The release lever has a set-screw with a knob to prevent accidental opening of the clamp when locked in place.

Features:

1. Ideal for holding awkwardly shaped pieces.

2. Easy to adjust pressure and fit. Works by turning the 5/8″ baby stud in the rear of clamp.

3. The chain is built with high-grade heat-treated alloy steel for maximum toughness and durability.

4. Two 5/8″ baby pins provides strong support for lighting fixtures in opposite directions.

5. The embossed neck of 5/8″ baby studs offer the maximum friction for mounting a lighting fixture.

Embossed neck offers the maximum friction.

Always lock with safety T-handle for better protection.

On a tree.

On a steel tube.

Kino Flo is a registered trademark of Kino Flo Lighting Systems.

SUPER CONVI CLAMP

The Super Convi Clamp is more than just an amazing clamp, it's the foundation of an entire grip system. Features a hexagonal receiver that accepts dozens of Convi accessories from a simple stud to the versatile Max Arm to mount almost any light fixture, camera or accessory.

The Super Convi Clamp, made of lightweight cast alloy, can be securely mounted on any tube from 5 to 51mm and equipped with a saddle for mounting onto flat surfaces. The elastic P.U. pad also reduces surface damage and enhances gripping action. All metal parts are made of stainless steel to make them sturdier with anti-rust features. The die-cast aluminum of the locking knob make it very rugged. With a built-in female socket it allows the use of any attachments to hold anything from backgrounds to lighting fixtures. The spring safety locking system also offers double insurance when the screw locking action is not completely finished.

Opening for shoulder strap

KS-099 Bracket for Vagabond Mini Lithium Portable Power Pack

160g 5.7oz

US-KG012611

Great widget for offering mounting solutions to the Vagabond Mini Lithium Portable Power Pack. Matte-black, neat profile, and the sturdy steel yoke is built to go through strap slots on the Vagabond and hold it without slipping. Through a single screw, it can be quickly and firmly fastened to the 1/4"-20 socket of a power pack. The welded hex stud is customized to fit the Convi clamp and four-way clamp, leaving the power pack mounted anywhere without spinning. Each end of the yoke is slotted for accommodating a shoulder strap, making it easy for moving and carrying the portable power pack. * Vagabond Mini Lithium is a registered trademark of PAUL C. BUFF, INC.

With adapters

With adapter and V mount battery

KS-199 Multifunction V-mount Battery Bracket Kit

US-KG022411

Made with Convi Clamp (KCP-700) and a V-mount battery bracket, it offers a great storage and mounting solution for your battery and transformer and an ideal way to both stabilize your light stand and free up floor space. The bracket constructed from precise laser-cut steel with black matt powder-coated finish, makes it work seamlessly with battery, transformer and Convi clamp. The built-in V-mount battery holder allows you to secure mount a battery on the bracket effortlessly and a D-Tap output is also equipped for connecting your gear. In the reverse position of the bracket, the unique transformer cradle keeps your transformer in place inside the bracket with the elasticized Velcro. Simply making use of two tear-shaped holes, the bracket can be quickly hung on the plastic stoppers mounted in the bottom of Convi Clamp. With the spring-loaded clamp, it allows it to fit a variety of stand widths up to 50mm in diameter and is easy to snap on and off for quick set up or take-down.

(KCP-101)

Ratcheted handle

6 milling flats

Anti-Slip rosettes
friction disc.

US-KG100211

KCP-101 Max Arm w/ Ratcheted Handle

The Max arm is especially designed for lighting, video, film or still use. The multi-positioning arm has 90° pivoting, 360° rotating ends and a 360° elbow rotation. The center ratcheted handle controls and locks all three movements, which allows partial loosening for safe and precise positioning of a small light fixture or camera exactly at the angle you need it. Both ends come with ball joint 5/8″(16mm) studs; one is tapped for a 3/8″ and the other is tapped for a 1/4″. It is so versatile that can be set at any awkward position or odd place.

H max	W	max
53cm 20.8″	1kg 2.21lbs	4kg 8.8lbs

Features:

1. Metal ratcheted handle for easy slight adjustment and can be set to any angle.
   Ideal for clamping in a confined space, or if a specific handle position is desired.
2. The metal-like engineering thermoplastic friction discs with Anti-Slip rosettes friction disc design offers a solid grip.
3. The storage length is 28.5cm and fully extens to 53cm with net weight 1kg making it compact & portable.
4. Both ball joint studs with multi-milling flats can fit into baby sockets fast and hold objects stable.

KCP-170 Hybrid Head

W 100g 0.22lbs

Mini version of double grip head (1.7") system that is tapped with two V jaws for tubes size (4/8")13mm and (3/8")10mm in both sides. Features one 5/8"(16mm) hex baby stud with 3/8"-16 female thread which offers a variety of combinations for lighting and video accessories. Superior high-pressured gasket is equipped between two metal-like thermoplastic friction discs with a teeth device, and aluminum die-casting shells give the most solid grip and precise positioning. Compact size (dia. 43mm) and light weight (100g) is ideal for car-mounted shooting, tabletop and product imaging as well as miniature work.

US-KG101311

KCP-172 Mini Articulated Arm-Single Section

L 28.5cm 11.2" W 280g 0.62lbs

Constructed with two Hybrid Heads and an aluminum tube (dia.13mm, 1.1mm thickness and 28.5cm length) with a matt black anodized finish. Each Mini Grip Head is equipped with a baby pin with multi-milling flats that can fit into a baby socket fast and hold an object stable. The 3/8" and 1/4" thread are tapped separately in each baby pin which allows it to fit into a variety of lighting and camera accessories.

US-KG101411

KCP-173 Mini Articulated Arm - Two Sections

L 57cm 22.5" W 460g 1lbs

Similar function as KCP-172 but also includes one Hybrid Head and one aluminum tube. It's easy for positioning your camera accessories or a small lighting fixture at any awkward position or odd place with Kupo Convi Clamp. Ideal for clamping in a confined space, or if a specific handle position is desired.

The Kupo Rocks arm is a precise and versatile articulating arm designed for holding field monitors, recorders, LED lights and microphones on camera rigs. Friction wheel controls ball-joint tension simultaneously making the arm handy and convenient to operate. The ends are engineered for 360 degree rotation plus 90 degree pivoting that provides great versatility for easy positioning. A unique taper engagement mechanism facilitates ball-joint fine adjustment even when tightened. The interchangeable 7 different accessory tips can be easily installed using the #3 Allen key. This provides a great solution for connection and mounting needs in video and film application.

Features:

1. Made of solid aluminum alloy with CNC machined and black anodized.
2. 9″ & 11″ two standard length measures from end to end with tips.
3. One end 1/4″-20 male and another end 3/8″-16 male stainless steel accessory tips are included as standard.
4. Load Capacity : 8kg (17.6lbs) in 90 degree set up.

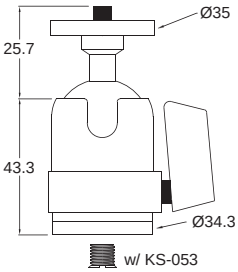
KUPO MINI BALL HEAD WITH HOT SHOE ADAPTER (KS-CB03)

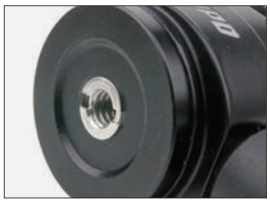
KS-CB03 Mini Ball Head w/ Hot Shoe Adapter

108g
3.8oz

US-KG010011

Loosening the one-action knob allows movement of the ball head in all directions. The extra groove allows the ball to tilt 90 degrees in one direction. The hot shoe adapter is also equipped with a 1/4"-20 thread socket on the bottom of the solid aluminum-constructed ball head.



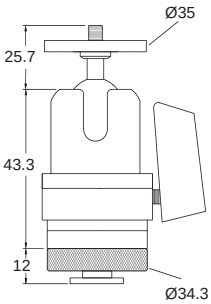


KS-CB05 Midi Ball Head

140g
4.94oz

US-KG006211

Constructed from lightweight aluminum housing, the hard ball moves smoothly into position with the single-action lever. A groove design also allows it to tilt 90° in one direction. It can allow you to properly orient your camera on any other tripod model, whether it has a 1/4"-20 or a 3/8"-16 stud – the head has a 3/8" thread and comes with a reducer bushing to make it compatible with the 1/4"-type stud. A camera can be attached directly to the ball head, or a quick release system can be added to speed up camera attachment.



KS-CB07 Midi Ball Head with Hot Shoe Mount

150g
5.3oz

US-KG019012

Constructed with sturdy aluminum, the Kupo Midi ball head with hot shoe offers an ideal mounting solution for your lights and monitors on a camcorder or camera while shooting video. Feature a single locking knob for fast and safe operation and providing a rock solid support up to 4.4 lbs (2kg).

Featuring a fantastic spring-loaded ball bearing mechanism that allows you to pull a 1/4"-20 top mount out of the bottom portion in just a second. The aluminum built bottom portion has a 1/4"-20 female thread that can be securely attached to any lighting or video accessory and comes with 1/4"-20 male stud. The spring locking mechanism with hex-shaped receiver not only keeps the top mount from rotating, but makes it easy and quick to attach or remove by just pushing the red release collar down. Ideal for mounting monitors, lighting and mics on the articulated arms or anything that comes with 1/4"-20 male thread.

US-KG013912

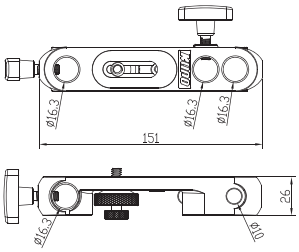
KUPO CAMERA BRACKET (KS-CB01)



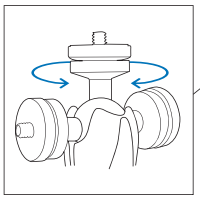
KS-CB01 Camera Bracket W 200g 0.44oz US-KG006411

This camera bracket is designed for the Max Arm. Constructed with aluminum die-casting which makes it very lightweight and durable. In addition to a standard 1/4"-20 inch thread mount for a small camera, it also comes with a 1/4" to 3/8" adaptor to accept different sizes of thread mounts. There are four 3/8" female sockets available on the bracket that can connect two max arms from each side giving it the most stability. The 7mm female socket is also built for an umbrella reflector.

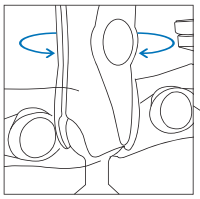
KS-CB02 Quick Release Camera Plate W 200g 0.44oz US-KG093611

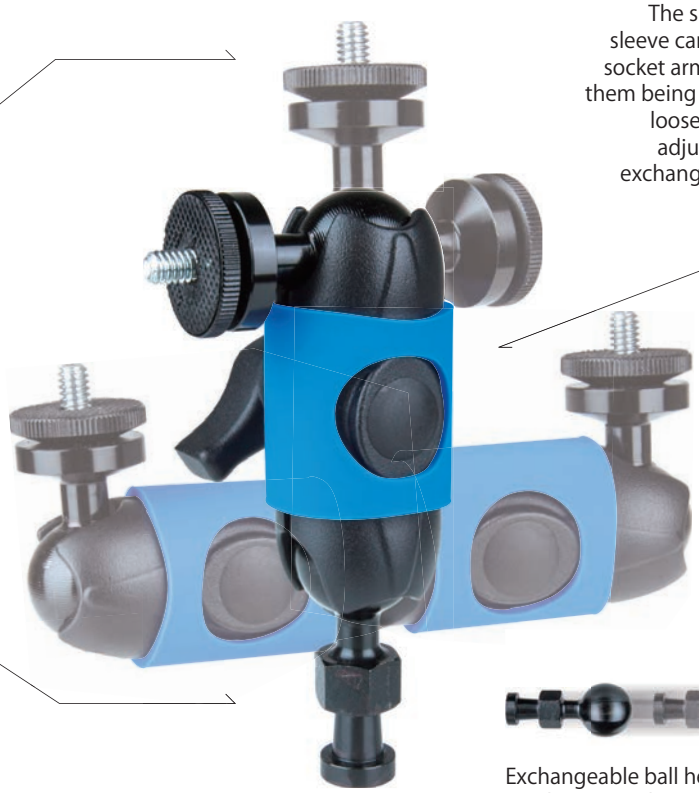
The quick release plate is easy to set up and works great offering the ability to quickly move from tripod to hand held photography. Safety lock is also equipped to prevent the quick release from inadvertently opening. The standard 3/8"-16 thread is tapped on the bottom and a 1/4"-20 reducer bushing is attached making it compatible with flash brackets, tripods, light stands, Convi clamps, etc.

The Kupo Super Knuckle System is an innovative modular system that features a double-ended shell that accepts two ball joints mounted to interchangeable accessories on either side. Constructed from a die-cast aluminum alloy shell, the Super Knuckle System can support up to 17.6lbs (8kg) and is ideal for a wide range of mounting applications for lighting, cameras, monitors, tablets, smart phones and any other mobile device. The shell has a single knob in the center to tighten both ball joints simultaneously and offers complete freedom to position accessories in any position. The standard dia. 26mm ball has a serrated surface for secure locking, and the blue silicon rubber sleeve allows for simple operation by holding the unit together while changing the ball or adjusting the angle. An array of interchangeable components and accessories are available with the Super Knuckle system, in addition to the popular Hex Baby Pin version for mounting with a Convi-Clamp, or the Super Knuckle with a Baby Receiver, or the VESA Monitor Mount Kit.

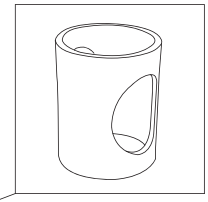


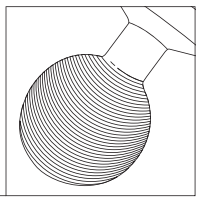
Angle adjustable in all directions.





The silicon rubber blue sleeve can hold the double socket arms tightly to avoid them being taken apart while loosening the knob for adjusting the angle or exchanging the ball head.





The serrated surface treatment increases the friction of ball joint.

Exchangeable ball heads and double sockets offers an ultra-versatile mounting solution.

US-KG037111

W 200g 7oz max 8kg 17.6lbs

KS-470 Super Knuckle w/ Hex Baby Pin

EZ TIE

Ideal for sound, lighting and audio/video equipment. EZ-Tie is made by Swiss-made looms and strict quality control to assure consistent quality with superior performance. Hook is made from A grade Nylon and has high peel giving it an average 55 hooks per sq inch. It is formed under high temperatures to keep it with better elasticity and more durability. EZ-TIE has been tested under +93 degree C and -56.7 degree C and lasted 1,000 hrs matting without fail. The working temperature from 80 degree C to -20 degree C. High life cycle with over 10,000 closures. Washable, UV resistant to prevent discoloration.

Applications:

- Help to organize cable sets neatly with diverse colors.
- Write-on identification label for great cable organization.
- Sturdy Nylon buckle offers greater holding power against movement, and makes for longer use.
- Perfect for use as tie down for attaching equipment on a desk or table.
- Convenient for wrapping up lighting stand legs to keep them well fastened for transportation.
- Ideal for use as a temporary hanger during installation.

BG4506 6 Inch Heavy Duty Black Ball Bungees

Each bungee cord measures (4.5mm) 3/16" in diameter and has an attached black plastic ball measuring 28mm (1-1/8") in diameter. Set includes 50 ball bungees. Easy to use, quick to install. Just feed the elastic loop through a grommet until the plastic ball is flush, then attach the loop to a fixed point to secure a tarp. Great for securing textile on the butterfly frame, cables, stands, hoses, camping and tying down tarps and shades, etc. Elastic cord design allows for stretching and variations in length from 6"up to 8".

SUCTION CUPS

KUPO Pumping Suction Cups offer a temporary solid mounting solution for smooth, nonporous surfaces. A red line indicator is equipped in most suction cups warning of any vacuum loss. Pumps in any adverse shooting circumstances.

Kupo Pumping Suction Cups offers a temporary solid mounting solution for smooth, nonporous surfaces. Each Kupo Suction cup comes with 5/8" baby pin, 3/8" thread bolt or 3/8" thread socket to allow user to mount small lights, cameras and accessories on windows, mirrors, automobiles, boats and any smooth, nonporous surfaces. Because of the excellent rubber material with silicon, it can be used at temperatures from -12 degree to 49 degree C. Red-line indicator is equipped in most suction cups warning of any vacuum loss. Pumps in any adverse shooting circumstances.

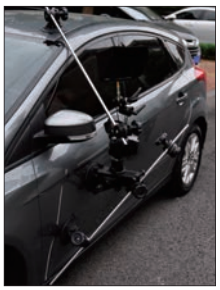
Suction Cup w/ Swivel coupler

W 1.4kg 3.08lbs max 20kg 44lbs

6" suction cup comes with a swivel coupler for 2" tube primarily designed for vehicle rigging, offers a temporary mounting solution on the car and excellent support arm with the swiveling coupler. (Supplied with pad protector)

Mount to car hood



US-KG097311

KSC-101

W 1kg 2.2lbs max 6kg 13.2lbs

6" Vacuum Suction Cup w/ Compact Camera Bracket

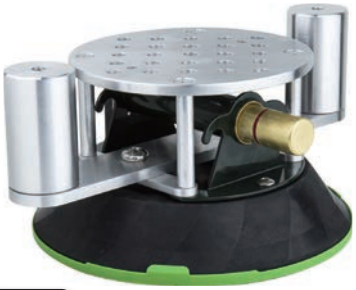
6" pumping suction cup equipped with a lightweight angle adjustable camera bracket for side-door car mounting to any desired position with ease and comfort. The aluminum mounting plate drilled with 3/8" (10mm) holes to support all ball heads. Unique mechanical interlocking design makes it a snap from side-door to hood car mounting. (Supplied with pad protector)

KSC-102 US-KG097411

10" Vacuum Suction Cup w/ Cheese Plate

W 2.5kg 5.5lbs | max 15kg 33lbs

10" pumping suction cup equipped with an aluminum cheese plate drilled with 3/8" (10mm) holes. Ideal for rigging cameras or lighting fixtures on cars or any smooth non-porous surface. A red-line indicator warns if there is any vacuum loss. (Supplied with pad protector)



KSC-106 US-KG086911

10" Suction cup with Cheese Plate & 1-1/2" (48mm)Starter

W 3.9kg 8.5lbs

10" vacuum suction cup with standard 3/8" holes round cheese plate and two 1-1/2" starters. Primarily designed to mount cameras and lighting equipment to cars. Features two 1-1/2" starters, 3-1/2"(9cm) long, which allows it to fit for 1-1/2" (48.3mm) Speed-Rail systems. Supplied with pad protector.

KCP-654 US-KG604611

2" Coupler w/ Swivel Mounting Camera Plate

W 1.85kg 4.07lbs

Constructed with a heavy-duty steel ball engineered with a camera mounting plate and aluminum coupler for a 2" (48-51mm) pipe/tube, this provides a great mounting solution for rapid camera mounting and rigging. The camera plate has a standard hole pattern with threaded bore and slots allowing a dovetail slide plate or camera to attach. The ratcheted handle with the ball allows for easy adjustment of the camera to any desired position. This high tensile-strength aluminum coupler is made to fasten on to 2" (48-51mm) tube/piping.

KSC-130 US-KG097511

Mini Camera Ball Leveling Head

W 0.9kg 2lbs | max 9.5kg 21lbs

Mini version of KSC-140 which also constructed from solid 3/8" thick aluminum plate with 6"(152mm) x 5"(127mm) comes with a sturdy dia. 45mm ball head and tightening knob allowing it to mount to a camera on car door mount(hostess tray) or hood mount with ease and convenience.

KSC-140 US-KG087811

Universal Camera Ball Leveling Head

max 34kg 75lbs

W 2kg 4.4lbs

Features one dia. 55mm solid ball head and tightening knob allows you to quickly lock your camera's position with ease and convenience. The base is made of 3/8" thick aluminum cheese plate measures 8"(203mm) x 8"(203mm) and comes with the industrial standard 3/8" holes, spaced every 1". The top mounting plate comes with a 3/8"(10mm) slot (100mm in length) allowing it to use a standard ARRI Sliding Base.

KUPO SUPER RISER (KCP-433)

US-KG401211

KCP-433 Super Riser

W 920g 2.03lbs | L 27cm 10.7" | H max 43cm 17"

Constructed from black anodized aluminum, the extension riser includes one riser and two sections which come with a 3/8"-16 thread male stud in one end and a 3/8"-16 thread female in the other. Plus a heavy duty metal ball head with a 3/8"-16 thread male stud and a 3/8"-16 thread female in the base. Designed primarily to precisely position the camera in almost any desired position with the height-adjusted column and the ball joint adapter which is good for car mount shooting. The height can also be extended from 27cm (10.7") to 43cm (17") and can be locked with the die-casting aluminum wing locking knob.

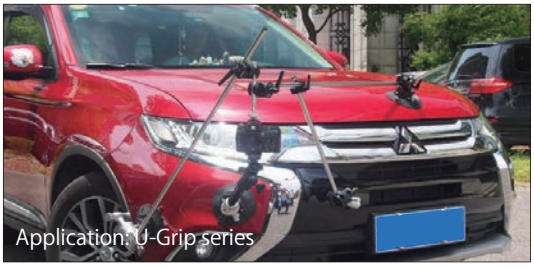
KCP-831B-RS Rubber Stopper Coupler

W 1.6kg 3.52lbs

US-KG818811

Made by sturdy and lightweight aluminum, the 2" (50cm) coupler equipped with 45 degree rubberized tube as a stopper which is perfect for both the top and bottom of the Flowcine Black Arm. Recommended for use with Extension Blocks or for off-road applications. (Set of 2)

U-Grip series is professional quality mounting gears specially designed to give your car mount extra stability and eliminate vibration for your camera or lighting. The variety of U-Grip gears made of CNC aluminum alloy with black anodized finish make it extremely easy to precisely position your camera or light at any angle you need. An ideal solution for a variety of mounting applications.



KCP-190
1.9" Gag Grip Head for 5/8" (16mm) Tube

W 265g 9.3oz

US-KG102012

Kupo Gag Grip head is constructed from solid aluminum alloy with black anodized, features dia.1.9" (48mm) compact size and is super lightweight. It's a mini version of 2.5"grip head that can still secure two 5/8" (16mm) tubes at any angle with one ratcheted handle especially designed for car mount shooting or any mounting requirement in movie, television and photographic production industries.

KCP-192 U-Grip head (1.9" Grip Head)

W 200g 7oz

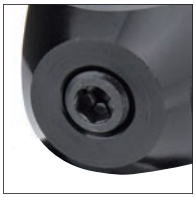
US-KG101611

Constructed from CNC aluminum alloy makes the U-Grip head durable and lightweight. The 1.9" (48mm) U-Grip is the mini version of 2.5" grip head that is a compact size that allows more flexible operating space and is ideal for storage or transportation. Features a 360 degree swivel 5/8" (16mm) receiver which can be locked down with the aluminum die-cast knob. All black anodized surface treatment.

KCP-194 US-KG101711

5/8" (16mm) Lockable Swivel Rod Clamps W 100g 3.5oz

The function is as the same as KCP-192 round U-Grip head but in a square shape. It also comes with center jaw which for 5/8" (16mm) rod allows a 360 degree swivel. The ratcheted handle is designed to lock rod and simultaneously with one clamping action.



KCP-196 US-KG101811

Multi 5/8" (16mm) Receiver Connector W 90g 3.2oz

Constructed from CNC aluminum alloy, this rectangular connector comes with two 5/8" (16mm) holes in each lateral face and a 3/8"-16 set screw in each base , allowing it to have a variety of combinations with any rods of 5/8" (16mm) in diameter.

KCP-198 US-KG101911

W 190g 6.7oz

Dual Multi 5/8" (16mm) Receiver Swivel Connector

Combination of two multi 5/8" (16mm) receiver connectors and a stainless 5/8" spigot which allows a 360 degree swivel. The 5/8" spigot has a 3/8"-16 female threads on each end which allows you to mount any equipment that comes with 3/8"-16 male thread.

US-KG092111

KS-111

5/8"(16mm) Adapter For 3/8"(F) To 3/8"(M) W 190g 6.7oz

This extruded aluminum 5/8" (16mm) adapter, is 70mm in length, which has 3/8"-16 female threads on each end and one 3/8"-16 male to 3/8"-16 male adapter in one end. Great for connecting to any equipment that comes with 5/8" (16mm) receiver, 3/8"-16 threaded male or 3/8"-16 thread female.

Kupo's car rig shot kit is designed for automotive photographers for the most effective way to rig shot for capturing a car in motion and blur effects. Not only is the sense of speed achieved but the interesting angles that would be nearly impossible in panning or tracking makes this rig shot a great tool for automotive photographers.

US-KG087611

KSC-400K Car Rig Shot Kit Includes:

1. **KSC-400M** x 3 Carbon Fiber Tube - Male 2" tube size w/ 1.2 M length
2. **KSC-400F** x 1 Carbon Fiber Tube -Female 2" tube size w/ 1.0 M length
3. **KSC-SP01** x 3 Button Handle Quick Release Ball Safety Pin
4. **KCP-842B** x 2 Burger Coupler w/ Baby Receiver
5. **KSC-06** x 2 Suction Cup W/ Swivel Baby Pin
6. **KCP-700B** x 1 Convi Clamp
7. **KS-CB01** x 1 Camera Bracket
8. **KCP-101W** x 1 Max Arm
9. **Carry bag** x 1

YOUTUBE CAR RIG SHOT KIT

The kit features a set of carbon fiber tubes which is half the weight and much stiffer than aluminum tubes. The Length is extendable from 1M(3.28ft) to 4M(13.12ft) by assembling 3 male and one female carbon fiber tubes. Three quick release bottom safety pins are also supplied to keep the tubes locking within seconds. The best mounting solution for an automobile is provided with two superior 6" pumping suction cups. Two burger couplers with the 16mm female are designed for efficiently connecting the assembled tube and suction cups. The shooting gear includes Max arm, Convi clamp and camera bracket, giving the most flexible movement and precise position for car shooting. All equipments is well stowed in the built-in lid organizer of the zipped carry bag which is made from reinforced double Ply Nylon to ensure optimal impact protection for the kits.

Applications:

Constructed from a CNC made aluminum, the plate with holes is used as a multipurpose utility bracket for various film related accessories. Specially design for mounting related accessories to cameras, monitors and lighting. It comes with the industry standard 3/8" holes, spaced every 1". The four corners are counter-sunk 82 degrees on one side.

Lightweight & low profile KUPO professional couplers are constructed from high tensile aluminum extrusion and have been developed for installations where load capacities of up to 500kg (1100lbs) are required. The KUPO professional couplers combine strength and durability with a high degree of safety. The couplers are designed to fit tubes with diameters between 48mm-51mm. Most have been tested and certified with TUV approval for a safe working load of 500kg (1100lbs) . The standard finish is polished. Custom color or logo is upon request.

Kupo half type coupler (KCP-831)
is approved by TUV Product Service

HALF COUPLER w/ STAINLESS STEEL PARTS

W 0.5 kg (1.1 lbs)
max 500 kg (1100 lbs)

- Fits tube Ø 48-51mm
- W/ M10 x 35 mm, Counter Sunk.
- Built with stainless steel parts. Great for outdoor applications or where rust-free conditions are required or chemical exposure is a concern.

US-KG806212

KCP-842B Black

SLIM TYPE HALF COUPLER w/ 16MM SOCKET

W 0.46 kg (1.01 lbs)
max 50 kg (110 lbs)

- Fits tube Ø 48-51mm
- Equipped with a 16mm (5/8") socket for lighting fixing accessories.

US-KG814211

KCP-847 Silver

BARREL JOINER

W 1.04 kg (2.3 lbs)
max 300 kg (660 lbs)

- Fits tube Ø 48-51mm
- Tube/Barrel joiner is made for providing a quick connection for two tubes together end to end.

US-KG808312

KCP-832ST Silver

SWIVEL COUPLER w/ STAINLESS STEEL PARTS

W 1.2 kg (2.64 lbs)
max 500 kg (1100 lbs)

- Fits tube Ø 48-51mm to Ø 48-51mm
- Built with stainless steel parts. Great for outdoor applications or where rust-free conditions are required or chemical exposure is a concern.

US-KG806612

KCP-873 Silver & Blue

45-DEGREE HALF SWIVEL COUPLER

W 1.46 kg (3.21 lbs)
max 500 kg (1100 lbs)

- Fits tube Ø 48-51mm to Ø 48-51mm
- Can fix in every 45 degree without a drift pin.
- To release or tighten, use hex tool to adjust the position.

US-KG810912

KCP-874 Silver

HALF COUPLER w/ QUICK RECEIVER

W 1.16 kg (2.55 lbs)
max 100 kg (220 lbs)

- Fits tube Ø 48-51mm
- Incorporates a 28mm (1-1/8") socket w/ safety lock system.

US-KG815612

KCP-875 Silver

SLIM TYPE HALF COUPLER w/ QUICK RECEIVER

W 0.96 kg (2.11 lbs)
max 100 kg (220 lbs)

- Fits tube Ø 48-51mm
- Incorporates a 28mm (1-1/8") socket w/ safety lock system.

- Fits tube Ø 30-51mm
- Comes with a dia.17mm spigot (Dabo) with 3/8"-16 bolt for fixture yoke.

QUICK RELEASE VERSION / C-01QB

- With a spring release collar to lock spigot automatically and push to release quickly.

A neat solution for attaching 3-phase (3 circuits) or DALI lighting track on 2" (51mm) pipe, tube or truss. This patented clamp is constructed of a classic burger coupler with aluminum alloy, making it sturdy yet compact and lightweight. Quick set-up and flexible with adjustments. Usable for 3-phase lighting track including ERCO, EUTRAC, ZUMBETOL and GLOBAL TRAC.

KT-057 Strut Channel Adapter w/ half coupler for 2" (50mm) tube — W 0.7 kg (1.54 lbs) — max 220 kg (440 lbs)

for Adapting Strut Channel to Pipe or Tube.

How to fasten the strut channel adapter:
1. Insert the adapter into the strut channel and rotate 90 degrees.
2. Spin the large hex nut to lock into the channel.

SAFETY WIRE

Kupo safety wire is made of galvanized steel wire, and is constructed in accordance with DIN3055 and DIN3060. It is used as secondary bonding for rigging, lighting and other equipment to truss or stand, rendering a secondary flexible coupling in addition to the regular fixture. Standard finish is metallic silver, Black coating is available upon request.

KUPO TV COUPLER (KCP-844)

YOUTUBE
KUPO TV COUPLER (KCP-844)

Features:

1. Constructed by rugged die-cast aluminum main body and extruded aluminum hinged locking jaw with TUV Approval.
2. Comes with a 28mm junior socket for luminaries or telescopic hanger.
3. Three fixing holes, with stainless steel helicoil insert to prevent thread stripped, fit diverse 28mm spigot.
4. The 3/8" threaded 16mm baby stud is also available and alternated with a 16mm baby socket by the spring latch bolt for lightweight luminaries and accessories.
5. Hinged locking jaw is restricted, making operation with single hand easier.
6. The safety wire is bult with the clamp to ensure this essential safety aid is always on hand.
7. Linchpin is attached with the safety wire to keep it safe for pan adjustment of luminaire while the knob of clamp is loose.

KUPO TV CLAMP (KCP-100B)

KCP-100B T.V. Clamp

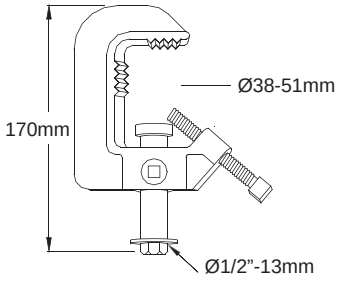
1.61kg
3.55lbs

250kg
550lbs

US-KG100111

The KCP-100B T.V. Clamp is a heavy duty casting C clamp and is supplied with a Tommy bar to improve grip. It ends in a 28mm(1-1/8") junior receiver. A collar ring on bushing is supplied for the safety linch pin to pass through the fixture spigot. There is a dedicated aperture in the clamp body for attaching the safety cable. This clamp works for round tube diameters from 22-54mm with load capacity of 250kgs. It is ideal to hang all types of luminaries in T.V. studios and theaters.

Note: When using c-clamps care must be taken to not over-tighten the pipe bolt which affixes the clamp to the batten. If this bolt is over-tightened, it can easily dimple or "drill" into the batten, seriously compromising the strength of the batten. A finger tight plus half turn with the wrench is all that is required.

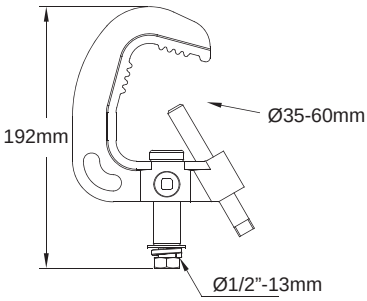


C-06 (US-KG060511)

Heavy Duty Iron Casting Clamp

W 0.87kg 1.92lbs | max 100kg 220lbs

The old C clamp or pipe clamp is designed for most hanging applications. Intended for use with 1-1/2" to 2" O.D. iron pipes in theaters. 2-1/2" long steel shaft with 1/2"-13 yoke bolt and washer. A square head pan set screw allows you to rotate the fixture. Comes in black powder coat finish.

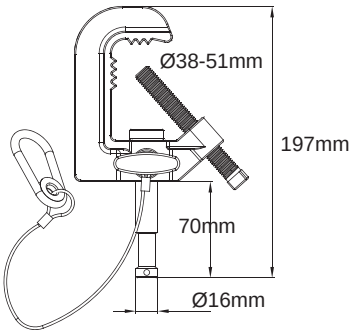


C-06T (US-KG062011)

Titan Iron Casting Clamp

W 1.25kg 2.75lbs | max 100kg 220lbs

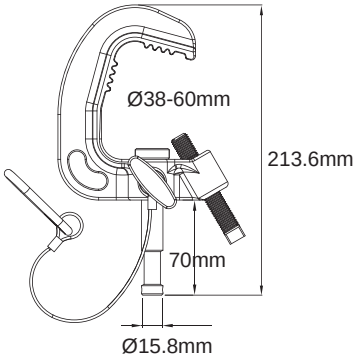
Designed to fasten luminaries to a tube or pipe of outside diameter 1-1/2" to 2-1/2" (35mm-60mm). This iron casting clamp is durable to hold a payload up to 220lbs (100kgs). Comes with 3-1/2" steel long shaft and 1/2"-13 bolt & washer. Main body has a bonding position to safety wire to anchor.



C-16 Baby Pipe Clamp

W 0.95kg 2.09lbs | max 100kg 220lbs (US-KG083521)

It is identical to old C clamp but has a 16mm baby stud. The collar on the top of the baby pin keeps it safe for pan adjustments of luminaries while the knob of the clamp is loosened. The safety wire is also built with the clamp to ensure this essential safety aid is always on hand.



C-26 Titan Clamp w/ 16mm Baby Pin

W 1.2kg 2.65lbs | max 100kg 220lbs (US-KG073711)

Equipped with a 16mm baby spigot for most of TV/Studio luminaries, this clamp fits the tube with diameter up to 38mm-60mm and will support up to 220lbs (100kg). Made of iron casting, the Titan Clamp is sturdy and durable and includes a safety cable for security. The Short-handle tommy bar prevents the handle from getting stuck with luminaire while in operation.

The Kupo telescopic hanger family features a quick release clamp allowing the user to quickly and securely suspend a lighting fixture or other equipment overhead for an unobstructed floor area. Constructed by quality steel with a superior chrome plated surface treatment for lasting durability. A stirrup head is on the end of the telescopic hanger designed for those lighting fixtures with clamps mounted on the head directly. A universal adapter is also available on the hanger for those lighting fixtures with a junior pin securely mounted on telescopic hangers. Safety pins for both versions are equipped to prevent the riser from slipping. A full range of telescopic hangers are supplied from lengths 3 to 10 feet (91.4cm-304.8cm) to meet all industrial requirements.

KS-210 Balance Adjustment Bracket

W 0.4kg 0.88lbs

Designed to be fitted between pantograph and unbalanced lighting fixtures with a baby receiver (16mm socket). A ratchet handle makes adjustments easy to allow the pantographs to work properly in a tight space.

The Kupole Family consists of spring loaded 2-section aluminum poles, the largest of the 3 sizes available extends to over 12' (370cm) in height! The unique spring locking expansion system locks the Kupole between the ceiling and the floor, or two walls, resulting in a quick, non-permanent mounting solution that only has a footprint of two inches in diameter! This unique product allows you to set up collapsible rigging, background support systems, lights, accessories, shelving, etc. The Kupole is an extremely versatile support and only takes a moment to set up without any tools, all with the simple flip of a handle.

- Deluxe aluminum casting handle incorporates a safety lock.
- It can be used in vertical or horizontal support of lighting or backdrop.
- 2 adjustable settings for a variable tension adjustment.
- Manufacturing in pole dia.45mm and 40mm and three overlapping sizes up to 370cm.
- Both silver anodized and black powder coated finish are available.

KP-KS03MT Metal Chain W/ Chain Weight

Chain Length: 4.0 m (13')
Made of stainless steel, the Kupo metal chain is a steel metal chain that will not break under tension and is kept taut by a chain weight that hangs from the bottom of the chain loop.

KP-DS01MT Background Paper Drive Set with Gray Metal Chain

US-KG068512

W 1.1kg 2.4lbs

Kupo Background paper drive set is a pair of adapters that expand and lock securely inside the core of a roll of seamless paper. The adapters can expand to accommodate paper core sizes from 46mm to 78mm in diameter. There is a drive side with a cog that accepts a metal chain that is driven by the metal chain to raise and lower the paper and a tension side with a knob that controls the amount of tension, preventing the paper from unrolling by itself due to gravity. The 13ft stainless steel metal chain will not break under tension and is kept taut by a chain weight that hangs from the bottom of the chain loop. Now with the addition of a metal chain, rolling up and down backgrounds is smoother than ever!

KSB-050 Gel Roll

W 450g 15.8oz

The Kupo Gel Roll allows you to keep gels/filters organized and safe in one neat roll while not being used. The unfolded size is 26"(W) x 32"(L) which is large enough so the gel/filter can be stored up to 100 pcs. The additional pouch stitched on the roll allows you to keep the gels/ filters in place. Meanwhile, the inserted gels/filters can be folded and rolled up into a 26" (L) with 5" in diameter cylinder and can be rolled and closed with a two Velcro-strap which is attached on the roll. The central carrying handle is equipped for carrying the gel roll with ease and convenience!

KU-HAND

KU-HAND is a rugged and professional glove designed to protect users hands for any task. The ergonomic fit is comfortable for any user. Padded mesh on leather top is excellent for ventilation; two-way stretch creates flexibility. Synthetic leather palm is soft and durable. Extra layer of leather on palm, index finger and thumb for better strength and protection. Smooth texture of fingers and reinforced fingertips make it perfect for handling objects and reduce wear and tear.

KSD-77 Empty Saddle Sandbag-Heavy Duty (77lbs)

W 600g 21.2oz | max 35kg 77lbs

This empty 77lbs saddle bag-design Sandbag is filled with sand by the purchaser and primary used to as a counterweight on a boom arm to balance a light fixture's weight. It can also stabilize a stand by draping it over the legs and preventing the top-heavy light stand from falling over. The bag is made from 1,000D black Cordex textured nylon, and the underside has a polyurethane coating which makes it water resistant and durable. Four integrated ladder-lock buckles allow you to tighten up the straps to keep the sandbag securely attached. Dimension: 39cm(15.5") x 46cm(18.2") x 12cm(4.8")

Ladder-lock buckle and straps help bag firmly attach on light stand or boom arm.

Dual haul handles with unifying wrap for carrying ease.

Triple Velcro ensure no sand leaks out of bags.

The new solid construction shot bag with non-slip strap design allows you to weigh down light stands by just wrapping it around the stand base. The premium shot bag also offers a variety of uses including an offset for a boom arm, wrap around a tripod or light stand bases, or hang midway on a stand handle to offset the weight of something. The 2mm steel balls are pre-filled and sealed up with the bag which makes it dense weight and it never leaks. The compact size design also makes the shot bag easy to carry, pack and it does the job perfect.

C-STAND DOOR RACK

YOUTUBE
KUPO C-STAND DOOR RACK (KS-119B)

US-KG023611

KS-119B C-Stand Door Rack

Built by robust 6.5mm thickness steel with matte-black surface finish, Kupo C stand door rack is designed to keep supports organized and accessible whether in the studio or on a location production. The steel rack can hold up to six C-stands with grip heads and arms. Built-in hoops accept bungee cords to stabilize the stands. The C stand door rack can be adapted to different C-stand length.

Built by robust steel with matte-black surface finish, the 46.5"(118cm) stand hangers offers a great storage and display solution for light stands. There are three dia. 8.5mm hole at 16"(40.6mm) intervals drilled for easily and firmly mounting to a wall or door rack. Extra dia. 10.5mm holes in each end are designed to connect with the Kupo four way clamp (KCP-950) or 3 way clamp (KCP-930) and any tube size from 35 to 50mm for excellent storage or display solution. There are four versions of stand hangers available to meet the different professional requirements. Lumber size 2x2 or 2x4 is recommended to be mounted behind the hanger to keep your wall from scratches. Weight: 2.85kg (6.27lbs)

118cm long stand hanger with 9 hanger pin holders on the rack.

China Ball, or Chinese paper lantern, is made by a paper lantern holder and lamp socket for creating natural soft light and pleasant skin tones in the film and video field. The frame of the China Ball is constructed from quality 3/16" (5 mm) steel with a chrome plated surface treatment. It is interchangeable by removing the screw nuts if a different size of lantern paper is needed. The rotatable steel ring makes it easy to control the output of light while the fabric is attached. The anti-kinking spiral top cable is also equipped to prevent the cable from becoming loose when subject to vibration. A ceramic lamp socket is firmly fixed on the round metal plate keeping the bulb from wobbling. Two 1/4"-20 and two 3/8"-16 threaded holes are pre-drilled underneath the round plate providing a great mounting solution through any grip equipment. Comes with 1/4"-20 or 3/8"-16 thread male. For safety, never leave lamps unattended.
